

Company Name: Dayton T. Brown Inc.

Profile:

Dayton T. Brown Inc. provides information enrichment services to commercial and government, and defense-related clients. We specialize in conversions to fully-structured formats from semi- or unstructured data in accordance with a wide variety of specifications. Our deployments include Interactive Electronic Technical Manuals (IETM/IETP), document databases (S1000D™), web- and paper-based technical manuals. We also provide curriculum development for instructor-led, kiosk, stand-alone, or web-based training. Dayton T. Brown also specializes in logistical information management services including Logistic Support Analysis Record (MIL-STD-1338-2A and -2B) and Performance Specification Logistic Management Information (MIL-PRF-49506). Furthermore, DTB provides a range of technical illustrating services including 2D-from-3D extraction, lightweight 3D viewers, raster-to-vector conversions, and intelligent graphics.

Publishing Services:

Dayton T. Brown's publishing services are tailored to meet every customer's requirement. We recognize the role that each media plays in its publication niche:

Paper – change-related, mission-critical publications such as technical manuals, maintenance manuals, user guides, and flight-line documentation; our output is thoroughly reviewed to ensure page integrity for the information's entire life cycle.

Electronic – Adobe Acrobat files or customer-specific formats; we supply hyperlinked and indexed PDF files (IPDF) for CD-ROM, DVD-ROM, or streaming delivery over the Internet.

Interactive – electronic publication content in native or mark-up languages; we can publish interactive content delivered in ETM, IETM, and IETP databases or flat files; we support commercial, government, or proprietary formats, including S1000D™.

Embedded – weapon systems, intrusive diagnostic programs, information kiosks, manufacturing control consoles, test stands, and other applications; we work closely with system designers and software engineers to ensure that our customer's electronic content is complete and accurate.

Writing/Training Services:

Completion Center / MRO / Part 145 Documentation

Dayton T. Brown specializes in developing technical documentation for VIP and Special Missions Aircraft for both U.S. and foreign operations. Our documentation professionals will analyze your requirements, perform on-site data collection, author precise technical documentation, and provide hands-on validation. Our subject matter experts (SMEs) lend their experience to a wide variety of industry and military segments. We can deploy documentation as supplements or integrate it into existing green aircraft technical manuals in your specific electronic or interactive formats for: Flight Manuals, Maintenance Manuals, Parts Catalogs, and Wiring Diagram Manuals. We author and repurpose data to produce FAA-approved, FAR Part 145 repair station manuals. DTB can tailor make FAA-required computer-based technician training programs that reflect the quality and repair procedures specific to your facility.

Illustration Services:

Our staff of illustrators produce graphics from the simplest block diagrams and line conversions to the most complex exploded views and functionalized wiring diagrams. In addition to providing most native file formats, we can provide a variety of vector and raster formats according to your need. Our technical illustrators specialize in rendering digitized raster graphics into true, mathematically-based, vector formats with an unparalleled degree of verisimilitude. Our process guarantees full vector compliance and re-usability for future modifications and intelligent graphic applications.

Conversion Services:

We provide content conversion services for customers requiring the accurate and fully-audited transformation of unstructured, semi-structured, or fully-structured data from one standard or non-standard format to another. Our information management specialists convert legacy data to new, or updated, specifications. We create the required file types and establish or supplement file repositories and existing databases. We also specialize in conversions to IETMs/IETPs which can range from linked, static files to interactive content assembled on the fly from a common source database. Our database publishing systems can deliver a manual for a specific model or serially numbered piece of equipment without additional authoring.

Logistics Services:

Development of a comprehensive Logistics Support Plan based upon a detailed analysis of engineering design data is essential to establishing the most cost effective approach to ensuring optimum system or mission availability. Dayton T. Brown's logisticians are experienced in the preparation of Logistics Management Information (LMI) in accordance with all government standards, including DoD Requirements for a Logistic Support Analysis Record (MIL-STD-1338-2A and -2B), Performance Specification Logistic Management Information (MIL-PRF-49506), and the emerging GEIA-0007 standard.
